

### What should I already know?

- Names of common pets, farm animals and jungle animals.
- Know that animals need to eat food.
- Understand that we should look after all living things.
- Notice that we can find animals in specific places (e.g., if you lift up a log you might find a minibeast, if you look in the trees you might see a bird).

### Key Knowledge

- **Pet animals** are animals you have in your home to keep you company. Some common ones are: cats, dogs, fish, rabbits.
- **Farm animals** are animals that live on a farm and give us food. Some examples are: chickens, cows, goats, sheep, pigs.
- **Wild animals** as animals that live in nature. Some examples are: deer, owls, badgers and hedgehogs.
- **Herbivores** are animals that eat plants such as cows, rabbits and deer.
- **Omnivores** are animals that eat plants and animals such as fish, chickens, hedgehogs and squirrels.
- **Carnivores** are animals that eat other animals such as cats and owls.
