

Weather and Seasons

What should I already know?

- Weather changes at different times of the year.
- When it rains the ground becomes wetter.
- Leaves fall from some trees.
- Know the names of some common types of weather.

Key Knowledge

- There are 4 **seasons** in one year.
- The **seasons** are **Autumn, Winter, Spring and Summer.**

Physical changes:

- In **Autumn**, the length of **daylight** is shorter and the **nights** are longer.
- Some trees lose their leaves in **Autumn**.
- **Weather** often changes in **Autumn**.
- In **Autumn**, the **weather** is usually **cold, windy, rainy, cloudy**.
- Even though it is usually cold, it can still be **sunny** in **Autumn**.

Human changes:

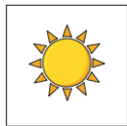

- Seasons affect what people do in our community. People dress in warm clothes.
- People celebrate different festivals.
- Shops may be decorated differently.
